EXECUTIVE PROFILE

I am currently studying remotely at Code Institute, an online coding bootcamp where I am pursuing my passion in Full Stack Software Development. My passion for anything tech has been my motivation and the driving force behind my pursuing this course and has helped me not to shift focus despite a huge career break due to relocation from my Country of origin to Ireland.

I have a Higher National Diploma (HND) certificate in Computer Science from my Country of birth but on coming to Ireland, it became obvious that I have to upskill in order to secure a role in the tech industry but had to wait a long while to regularise my residency permit that will avail me the opportunity to access third level education in Ireland.

Since I have been granted my residence permit, I believe that now is my time to chase my dream and that I am already doing by enrolling in this online coding bootcamp at Code Institute and hoping to get a role at the end of the course.

SKILLS

TECHNOLOGY SKILLS

- Front-end: HTML5, CSS, JavaScript.
- Back-end: Python3
- Python Automation using Zapier app
- Use case and user stories.

SOFT SKILLS
